The promise behind everything we make. AI agents made video fast; they didn't give it taste. Blitterbox installs your brand's design judgment into your agent, so every frame looks like a design team was involved.

POSITIONING

For technical founders and dev-marketers who make launch and explainer videos with AI coding agents, Blitterbox turns your style guide into isometric components your agent can animate. Unlike AI image tools or DIY Remotion, every frame stays on brand and editable.

PERSONALITY

Precise	**Crafted**	**Dry**
not fussy	not precious	not cold

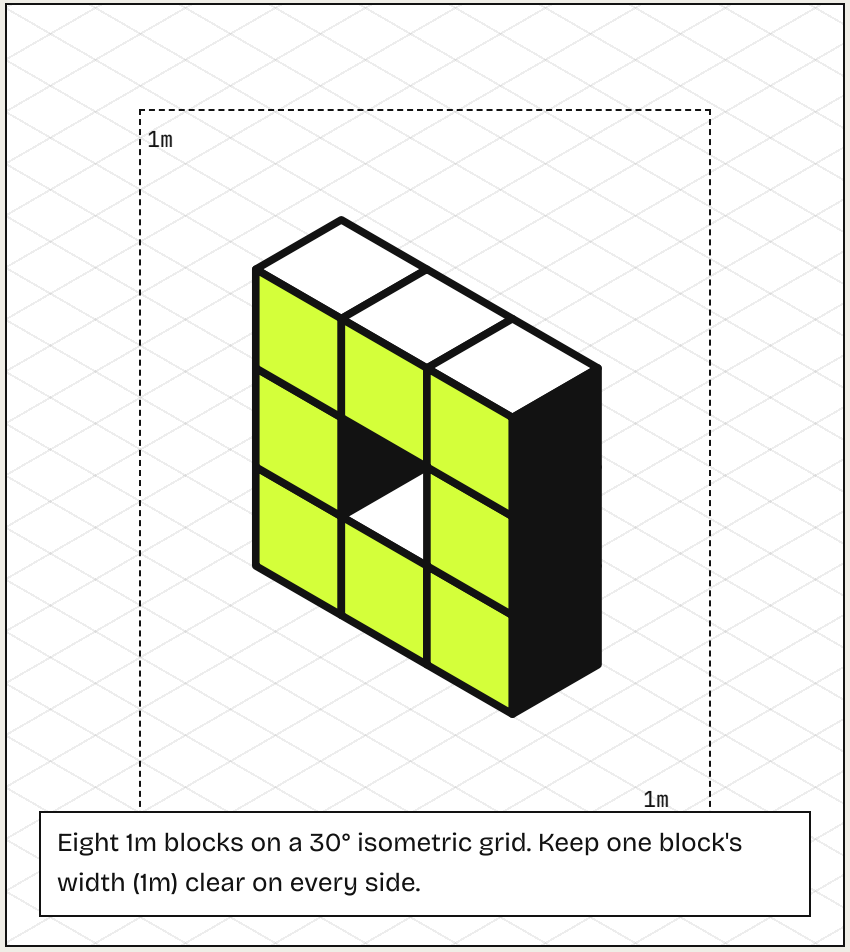

THE ZAG

MOST AI TOOLS	BLITTERBOX
Glowing gradients	Ruled paper and ink
"Magic"	Labeled parts
Instant, disposable	Exact, reusable

ONLINESS

The only brand kit for AI-made videos that turns your style guide into animated isometric code your agent can use.

A · CONSTRUCTION AND CLEAR SPACE

Eight 1m blocks on a 30° isometric grid. Keep one block's width (1m) clear on every side.

B · LOCKUPS

blitterbox

PRIMARY · HORIZONTAL

blitterbox

STACKED

MARK

C · ON COLOR

blitterbox

blitterbox

blitterbox

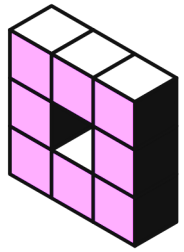

D · MINIMUM SIZES

blitterbox

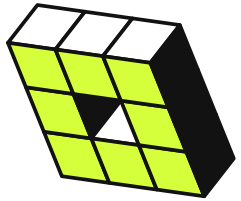

Lockup · 96 px wide

Mark · 24 px

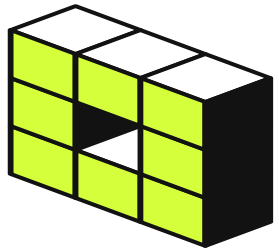

Below 24 px · flat favicon

DON'T Recolor the faces

DON'T Rotate it off the isometric grid

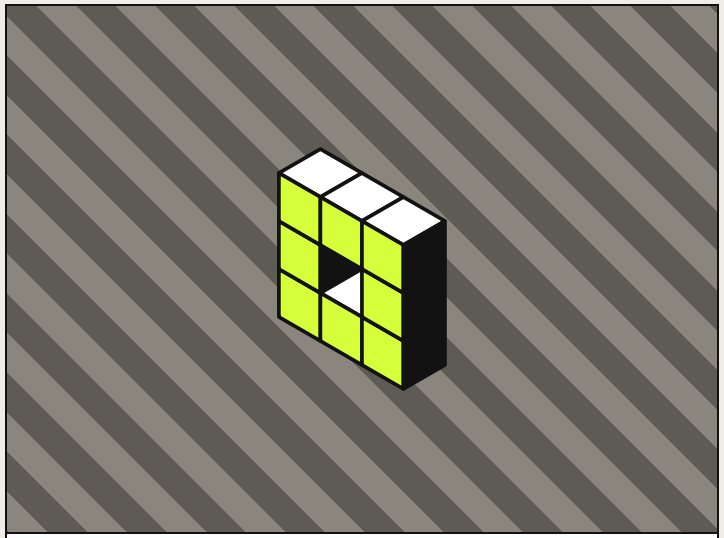

DON'T Stretch or squash it

DON'T Add glows, shadows or gradients

blitterbox

DON'T Tighten the wordmark tracking

DON'T Place it on busy or mid-tone grounds

Vellum

HEX #EFEDE6
RGB 239 237 230
ROLE Paper, every background · 60%

Graphite

HEX #121212
RGB 18 18 18
ROLE Ink, type, lines · 30%

Chartreuse

HEX #D4FF3A
RGB 212 255 58
ROLE Highlight · 10%

SUPPORT COLORS

Cream
#F6F4EE · panels, box front, scene grounds

Paper
#FFFFFF · cube tops, cards

Pencil
#5E5B54 · secondary text

Shade
#9BC21A · chartreuse in shadow

Chartreuse is a highlighter: one element per surface, never a whole page except on packaging and stickers.

ACCESSIBLE PAIRS (WCAG CONTRAST)

Graphite on vellum	all text	16.0
Graphite on chartreuse	all text	16.2
Chartreuse on graphite	all text	16.2
Pencil on vellum	secondary text	5.8
~~Chartreuse on vellum~~	never	1.0

```

Aa

Bricolage Grotesque

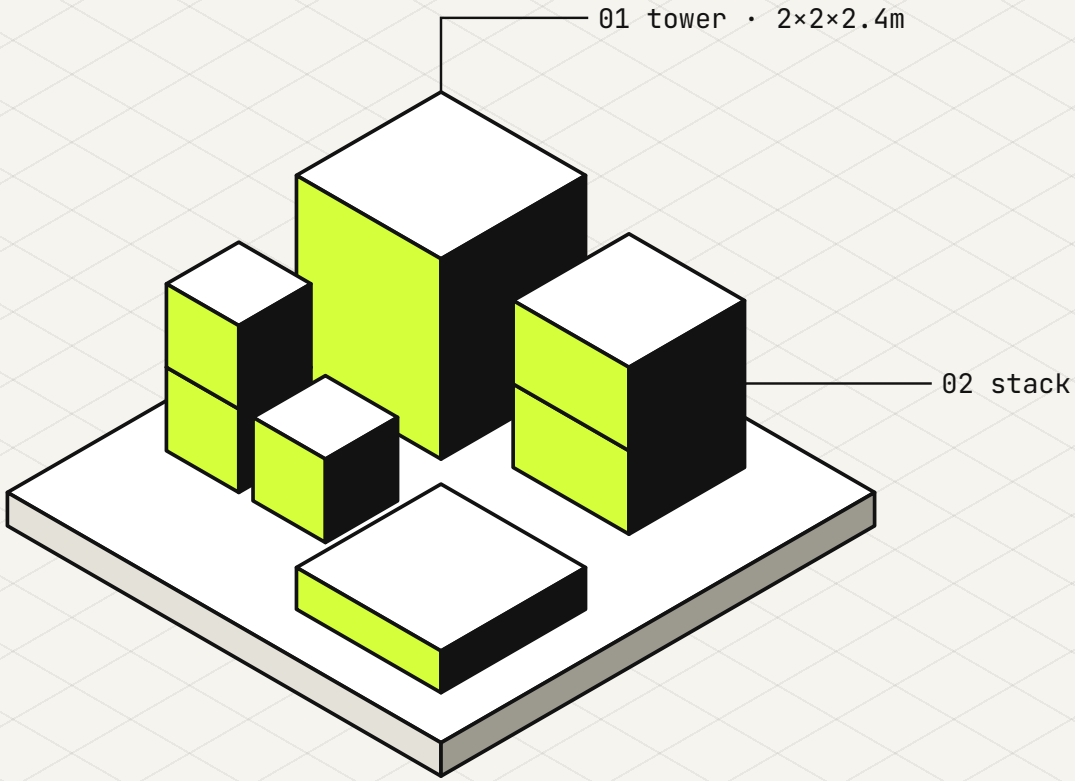

Display and body. Free on Google Fonts. 400, 600 and 800 only.

Aa

JetBrains Mono

Labels, figure numbers, callouts and code. Free on Google Fonts.

The wordmark is set in Bricolage Grotesque 800, all lowercase, at −1.5% tracking. Never tighter. Headlines use sentence case.

SAMPLE SCENE · BUILT FROM KIT PRIMITIVES

THE FACE RULE

TOP · Paper #FFFFFF

FRONT · Chartreuse #D4FF3A

SIDE · Graphite #121212

True isometric. 30° axes, no perspective, no rotation off the grid.

One line weight. 1.5 px graphite at screen size; scale it with the drawing.

Neutral ground. Platforms use vellum tones, so the brand faces pop.

Labeled, not decorated. Callouts and figure numbers instead of sparkles or glows.

In a customer's kit, their palette replaces chartreuse and graphite; the rules stay the same.

SPEC CARD

FIG. 02 / PRIMITIVES 24 parts

Blocks, grids and connectors

Parametric isometric parts. Every face reads your tokens, so recoloring the whole kit is one file change.

TERMINAL

```
$ npm install blitterbox
$ blitterbox import ./brand-guide.pdf
✓ 6 colors mapped to 18 faces
✓ kit written to ./blitterbox
```

The box is the hero image.

Every launch asset starts from this 3/4 box shot. It's the product as an object: something you can own, unbox and hand to your agent.

A	Mark, centered on the upper half, ruled vellum behind it
B	Wordmark, flush left, 1 module from the edge
C	Chartreuse band with two mono lines: what it is, how it works
·	Spine graphite with the chartreuse wordmark; lid chartreuse

Always shown in true 3/4 isometric view on a ruled vellum ground, with dimension lines when there's room.

VOICE · A SENIOR DESIGNER WHO SHIPS

Label, don't hype. Say what it is and what it does.

Short and exact. Numbers over adjectives.

Dry, occasionally funny. One wink per page, never at the user's expense.

WRITE

"6 colors mapped to 18 faces. Kit ready."

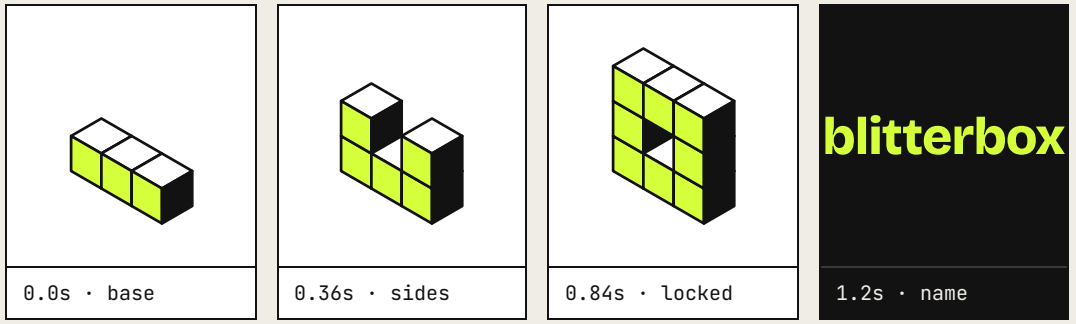

"Your brand, as parts your agent can animate."

NOT

"✨ Magic happened! Success!"

"Unleash the power of AI-driven creativity."

MOTION · THE LOGO ASSEMBLES

Blocks drop, they don't float. Each falls in 120 ms with a firm ease-out and no bounce.

Built, not revealed. Things assemble block by block; avoid fades, wipes and glows.

Callouts type in. Labels appear in mono, character by character, after the object lands.
